PROFILE SUMMARY

Computer Science graduate (BS, University of Gujrat, CGPA 3.40) specializing in full-stack web development with Node.js. Built QalamAid, a production-style scholarship platform using Node.js, Express, and MySQL with JWT authentication, a simulated payment gateway, and a Google Gemini AI chatbot, deployed live on Vercel. Comfortable across the full development lifecycle, from database design and REST APIs to deployment and debugging. Also experienced with WordPress/Elementor and currently exploring mobile development with React Native and Expo. Seeking a Full-Stack Developer role.

EDUCATION

University of Gujrat — BS Computer Science 2022 – 2026 (Completed)
CGPA: 3.40 / 4.0

Steps College — Intermediate in Computer Science 2020 – 2022 | Grade: A+

Ozone School System — Matriculation 2020 | Grade: A+

PROJECTS

QalamAid — Full-Stack Scholarship Facilitation Platform

Node.js, Express, MySQL, JWT, Google Gemini AI, Vercel, TiDB Cloud

- Final Year Project — Built a website that connects verified Pakistani students with donors and sends scholarship money directly to universities.
- Added secure login with protected passwords, password reset using a one-time code (OTP), and a university verification link that expires in 48 hours.
- Created a practice Easypaisa payment system with a one-time code step, and an AI chatbot (Google Gemini) that answers applicants' questions.
- Built the backend with Node.js, Express and MySQL, and put the website online using Vercel, with the database hosted on TiDB Cloud.

GitHub: github.com/ayeshakhan69673-source/QalamAid

School Website

Node.js, Express, MySQL, HTML/CSS/JavaScript

- Built a school website with home, login, register and dashboard pages, including a secure login system that remembers logged-in users.
- Designed the database tables and connected them to the website; hand-coded the design so pages fit well on both phones and computers.

GitHub: github.com/ayeshakhan69673-source/school-website

Mobile App Demo — Exploring Mobile Development

React Native, Expo

- Building a basic mobile app demo for a client. This is my first mobile project, made with free tools and tested on my own phone using Expo Go.

Scoop & Swirl — WordPress Website
WordPress, Elementor, TablePress, WPForms

- Built a one-page website for a pretend ice cream shop with a styled price table, a photo gallery, and a working contact form.

Other Projects
Front-End Web Development Portfolio (HTML, CSS, JavaScript); Tic Tac Toe (C++); Calculator (C#), all on GitHub: github.com/ayeshakhan69673-source

EXPERIENCE

Subject Teacher — Irfan Public School, Rawalpindi 2024 – Present

- Teach Computer Science, Physics, Science, and English to Grade 7–9 students; develop lesson plans that simplify complex technical topics.

Private Home Tutor 2024 – Present

- Provide one-on-one tutoring across multiple subjects, building strong communication skills.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, ASP.NET MVC

Database: MySQL, SQL Server

Authentication & Security: JWT, bcrypt/bcryptjs, express-session, dotenv

AI & APIs: Google Gemini API integration, prompt design for domain-specific assistants

Frontend: HTML, CSS, JavaScript, Responsive Web Design

Mobile (Exploring): React Native, Expo

CMS: WordPress, Elementor, TablePress, WPForms

Tools & Deployment: Git, GitHub, Vercel, TiDB Cloud, Aiven, Railway, VS Code, Postman, npm, nodemon

Languages & Other: C++, C#, Microsoft Office

ACHIEVEMENTS

- Awarded merit-based scholarships and certificates in three semesters during BS Computer Science at University of Gujrat.
