PROFILE SUMMARY

Computer Science graduate (BS, University of Gujrat, CGPA 3.40) specializing in full-stack web development. Designed and built QalamAid, a production-style scholarship facilitation platform using Node.js, Express, and MySQL, featuring JWT-based authentication, a simulated payment gateway, and a live deployment on Vercel with an Aiven-hosted MySQL database. Comfortable across the full development lifecycle — from database design and REST API development to deployment and debugging production environment issues. Also has hands-on practical experience building WordPress sites using Elementor and standard CMS plugins. Proficient in HTML, CSS, JavaScript, and ASP.NET MVC, with a strong record of academic achievement including merit-based scholarships. Seeking a Web Developer role to apply full-stack development skills in a production environment.

EDUCATION

University of Gujrat — BS Computer Science *2022 – 2026 (Completed)*
CGPA: 3.40 / 4.0

Steps College — Intermediate in Computer Science *2020 – 2022*
Grade: A+

Ozone School System — Matriculation *2020*
Grade: A+

PROJECTS

QalamAid — Full-Stack Scholarship Facilitation Platform | *Node.js, Express, MySQL, JWT, Vercel, Aiven*
Final Year Project

- Designed and developed a full-stack web platform connecting verified Pakistani university students with donors, routing scholarship payments directly to universities via an integrated payment flow.
- Built a token-based university verification system using UUID tokens with 48-hour expiry to prevent unauthorized access to donor and student data.
- Implemented secure authentication with JWT and bcryptjs password hashing; integrated Nodemailer for SMTP email notifications and Multer for document/file uploads.
- Built a custom Easypaisa payment gateway sandbox simulator with an OTP verification flow to replicate real-world payment integration end-to-end.
- Designed a multi-step forgot-password recovery flow and a RESTful backend architecture using Express and MySQL.
- Migrated and deployed the full platform to Vercel with the database hosted on Aiven (MySQL 8); resolved production environment and remote connectivity issues throughout.

GitHub: github.com/ayeshakhan69673-source/QalamAid

School Website | *Node.js, Express, MySQL, HTML/CSS/JavaScript*

- Built a full-stack multi-page school website (home, login, register, dashboard) with a REST-style API (/api/register, /api/login, /api/logout, /api/session) consumed by vanilla JavaScript fetch calls.
- Implemented session-based authentication using express-session and bcrypt password hashing, with credentials managed securely via dotenv.
- Designed the MySQL schema and data layer using the mysql2 driver with connection pooling and Promises.
- Hand-built a responsive UI with CSS Grid and Flexbox (no framework), using nodemon for local development workflow.

Scoop & Swirl — WordPress Website | *WordPress, Elementor, TablePress, WPForms*

- Built a single-page responsive business website for a fictional ice cream shop using WordPress and Elementor, as a hands-on exercise in CMS-based web development.
- Implemented anchor-based single-page navigation, custom-styled pricing tables (TablePress) with hand-written CSS overrides for column widths and theming, an image gallery grid, and a working contact form (WPForms).

- Demonstrates practical WordPress fundamentals: page-builder layout design, plugin integration, and custom CSS styling, complementing coded full-stack project work.

GitHub: github.com/ayeshakhan69673-source/scoop-swirl-wordpress

Front-End Web Development Portfolio | *HTML, CSS, JavaScript*

- Built responsive front-end interfaces for multiple websites, applying modern layout and web design practices.

GitHub: github.com/ayeshakhan69673-source/Front-end-web-development-portfolio

Multiplayer Tic Tac Toe | *C++*

- Developed a two-player console-based game with win/draw detection logic and turn management.

GitHub: github.com/ayeshakhan69673-source/TicTacToe-CPP

Calculator Application | *C#*

- Built a functional desktop calculator supporting basic and extended arithmetic operations.

GitHub: github.com/ayeshakhan69673-source/Calculator

EXPERIENCE

Subject Teacher — Irfan Public School, Rawalpindi *2024 – Present*

- Taught Computer Science, Physics, Science, and English to Grade 7–9 students.
- Developed lesson plans and simplified complex technical topics to improve student comprehension and engagement.

Private Home Tutor *2024 – Present*

- Provided one-on-one tutoring across multiple subjects, reinforcing conceptual understanding and building strong communication skills.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, Responsive Web Design

Backend: Node.js, Express.js, ASP.NET MVC, REST APIs

Database: MySQL, SQL Server

Authentication & Security: JWT, bcrypt/bcryptjs, express-session, dotenv

CMS & Web Publishing: WordPress, Elementor, TablePress, WPForms

Tools & Deployment: Git, GitHub, Vercel, Railway, Aiven, VS Code, Postman, npm, nodemon

Languages: C++, C#

Productivity: Microsoft Office (Word, PowerPoint, Excel)

ACHIEVEMENTS

- Awarded merit-based scholarships and certificates in three semesters during BS Computer Science at University of Gujrat.
